ttention of Steamboat Owners and Builders is partic larly invited to the GREAT SUPERIORITY OF GRIFFITH'S PROPELLER, over all others used in the propulsion of Steam Vessels. Many and various experiments have been made to test this over all others used in the propulsion of Steam Vessels.

Many and various experiments have been used to test this
Propeller against the very best in use:
AND IN ALL CASES IT HAS COME OFF VICTORIOUS.
It can be set to any desired pitch; is more efficient for a given
surface of blade; causes little or no vibration to the stem of the
vessel; gives high results for the amount of power applied, and
offers but little resistance when the vessel is under sail only. oners but little resistance when the vessel is under an only.
